

Widemouth Downpipe for EVO X (4B11)

PRODUCT FEATURES

TR all stainless steel and TIG welded EVO X 3" widemouth downpipe with braided flexible section and O2 bung fitted for mapping purposes. This downpipe allows high flow compares to the stock unit which has smaller piping and restrictive elbow. It is a complete bolt-on unit to perfectly fit the stock turbo. Faster boost response throughout, consistent torque increase and much higher horsepower gained from the TR EVO X widemouth downpipe even with the stock exhaust system.
