

TR Engine & Transmission Mount Kit (Subaru)

PRODUCT DESCRIPTION

The TR engine & transmission mount set offers all the best qualities of upgraded mounts with none of the disadvantages. The mount offers a stronger two-piece steel shell design with upgraded rubber bushings at 76 durometer hardness to avoid unnecessary vibration in the vehicle. This design helps prevent engine and transmission movements on acceleration and deceleration to make handling more consistent and predictable without sacrificing day to day drivability. TR engine & transmission mount set is a direct bolt on for all EJ series Subaru vehicles equipped with 5-speed or 6-speed transmissions.

Note: Vehicles with factory composite mounts may need additional parts.

APPLICATION

Vehicle	Model	Year
Subaru	Impreza WRX / STi (GRB)	2008+
